Anti-fatigue mat – Pro-Mat™

-----“In our opinion the anti-fatigue flooring manufactured by Bright Kid is of the appropriate consistency in that it ‘cushions’ the body weight without too much give.” . There was a unanimous agreement that they [ProMats] were much better than working on the hard floor. .

“We have also put Pro-Mat™ in our main lecture theatres and all staff thoroughly enjoy the comfort of being ‘cushioned’ while lecturing!”

P A Scott

Professor and Head of Department
